- Cutting diameter from 60 to 120 mm
- Direct drive hydraulic motor
- Rotor with knives MDC
- Rotor with hammers MDM

The hydraulic bush cutter M3 stands out for its strong structure and is specifically designed to be used on skid steer loaders. It is manufactured in 2 versions. The version MDC is equipped with a couple of "Y" knives and a third central knife to reduce any treated material treated material to fine grains. The bush cutter M3 is always supplied with welded hooks. The version MDM is equipped with HD rotor with HD hammers, with the possibility to mount heavy knives. **Drain is recommended for counter-pressures > 7 bar.** Rotation speed 3000 rpm.

OPTIONALS

Hydraulic hoses kit
